## ZERO CONSUMPTION IN STAND-BY MODE

## SAVE ENERGY PROTECT THE ENVIRONMENT

"Energy Smart" is the latest technological development by Elcoman. Available exclusively on the KOBRA range of shredders, "Energy Smart" saves energy and protects the environment by reducing emissions responsible for the Global Warming. The energy consumption of the paper shredder is managed by a dedicated software which operates in conjunction with illuminated optical indicators located on top of the machine. A KOBRA shredder requires electrical energy only during use. Once shredding operation is completed, the system management software

will automatically activate the stand-by zero consumption (Energy Smart) mode making sure that no more electrical energy is drained from the power source. At first glance, stand-by power consumption may be considered insignificant. However, every KOBRA shredder equipped with the "Energy Smart" system, compared to most of the traditional shredders on the market, can save up to Euro 20,00 a year\* of electrical energy and will reduce, by 65 Kgs, the carbon dioxide (CO2) that would have been introduced into the atmosphere for generation of the power saved by Energy Smart.

\* Electrical costs vary in each country

Zero power consumption  
in Stand-by mode

### Multimedia "Energy Smart" Shredders

- High performances office Shredders
- "Energy Smart": zero consumption in stand-by mode
- Automatic Start/Stop through electronic eyes
- Automatic stop with light signal for bag full and open door
- Available with computer forms top shelf
- Special hardened cutting knives for Floppy Disks, CDs and Credit Cards shredding
- Heavy duty chain drive with steel gears "SUPER POTENTIAL POWER UNIT"
- KOBRA 300 SS5 equipped with two motors for double reliability and double power
- 85 liters high quality steel cabinet (KOBRA 260 S5, KOBRA 300 SS5)
- Special removable Double Waste Bin to separate plastic shreds from shredded paper (KOBRA 240 SS5)

KOBRA 240 SS5  
KOBRA 260 S5  
KOBRA 300 SS5

The new KOBRA Multimedia "ENERGY SMART" Shredders are featuring extremely high performances. The unbelievable power of the motors (KOBRA 300 SS5 is equipped with two motors) and the strong cutting mechanisms built with the special carbon hardened steel allow safe shredding operations of the electronic data media. FLOPPY DISKS, CD-ROMS, CREDIT CARDS and PAPER are eaten up and shredded by these powerful units.

The reliable heavy duty chain drive "SUPER POTENTIAL POWER UNIT" ensure quite and longlasting shredding operations.

The "ENERGY SMART" management system through illuminated optical indicators monitors the power consumption on these models for energy cost savings and for environmental protection by reducing emission of carbon dioxide (CO2) by automatically activating the **Stand-by zero consumption** ("ENERGY SMART") mode making sure that no more electrical energy is drained from the power source.

KOBRA 240 SS5 is equipped with a special Double Waste Bin allowing separation of the plastic shreds from the shredded paper.

Kobra 300 SS5  
Two motors for double power  
and double reliability

Kobra 260 S5  
High shredding capacity.  
85 liters cabinet

Kobra 240 SS5  
Compact shredder with  
surpassing performances.  
Equipped with a special removable  
Double Waste Bin

"ENERGY SMART" management system  
with illuminated indicators for zero power  
consumption in Stand-by mode

Front door for easy emptying of collecting  
bag (KOBRA 260 S5, KOBRA 300 SS5)

Special designed carbon hardened  
cutting knives can shred CD-Roms,  
Floppy-Disks and paper

Removable environmentally friendly Double  
Bin equipped with a special mechanism  
separating plastic shreds from shredded paper.  
Does not require plastic bags.
