Kobra Turbo Boost

The TURBO BOOST System

The TURBO BOOST System is an exclusive feature available only on KOBRA products. This patented design is now available on selected KOBRA 240 shredder models.

A specially designed electronic control module allows the operation of the paper shredder in two different modes:

Standard mode:

The paper shredder operates according to its standard features and rating for normal operation.

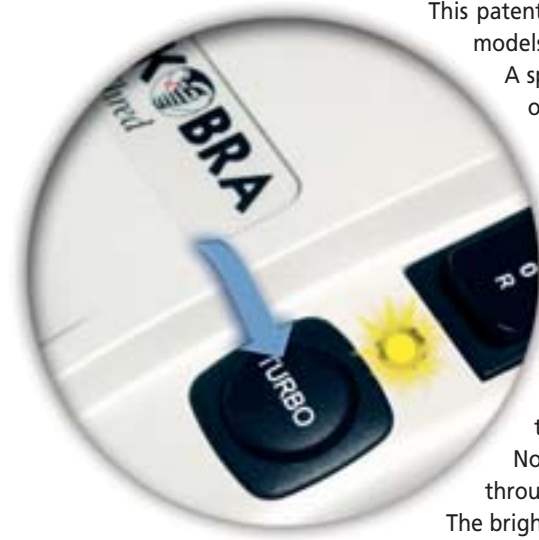

Turbo Boost mode:

By pressing the Turbo button located on the top cover the cutting capacity of the machine is temporarily increased by 30%, in case of a paper jam the Turbo Boost is all you need to clear the jam. No more messy paper particles on the floor.

No more clean-ups after a paper jam. The jam will feed right through the cutting mechanism and into the waste bin in a flash.

The bright Turbo light indicates reactivation of the Turbo Boost after each use.

KOBRA TURBO BOOST Shredder features unmatched shredding capacities up to 52 sheets in one pass.

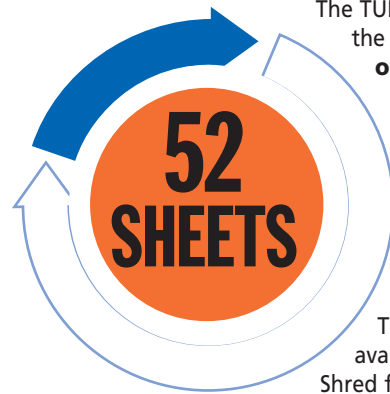

Shredding capacity

The TURBO BOOST System is an extremely convenient feature which assists the operator during the shredding operation. Accidental jams of **up to 30% over the normal capacity** of the shredder can now be cleared by TURBO BOOST.

TURBO BOOST eliminates the need for reversing the jam out of the machine and having to reduce the amount of material and retrying to shred. This state of the art exclusive KOBRA feature will help the operator perform any shredding project in the most efficient manner. Accidental jams are not a problem with TURBO BOOST. Capacity can be increased up to **52 sheets** at a time.

The TURBO function will be ready for use again in 30 seconds after each use. The TURBO light signal on the top cover of the shredder indicates availability of TURBO BOOST.

Shred fast, shred clean with TURBO BOOST.

without TURBO BOOST

with TURBO BOOST

These demonstrations show an ordinary shredder after a jam and a shredder equipped with TURBO BOOST feature after a jam.

If the paper jam is caused by up to 30% more paper than the normal capacity of the unit, the TURBO BOOST will clear the jam immediately and eliminate the need for reversing the shredder.

TURBO BOOST will also eliminate the spread of shredded material around the machine and in the work area.

Zero power consumption in Stand-by mode

Multi-Purpose and Multimedia "Energy Smart" shredder

- Compact and strong shredder with very high performances
- Two models available in straight cut and two models available in cross cut
- "Turbo Boost" system for extra shredding capacity
- "Energy Smart": zero power consumption in Stand-by mode
- Automatic Start/Stop through electronic eyes
- Automatic stop when waste bin is out with light signal
- Does not require plastic bags
- Carbon hardened cutting knives take staples and paper clips
- Heavy duty chain drive with steel gears "SUPER POTENTIAL POWER UNIT"
- Special removable Double Waste Bin to separate plastic shreds from shredded paper (all models)

Kobra 240 Turbo Boost

KOBRA 240 "Turbo Boost" shredders carry the latest and most advanced developments in the office paper shredder technology. Unbelievable performances: through the exclusive "Turbo Boost" system, this range of KOBRA shredders features unmatched shredding capacities both in straight-cut or cross-cut cutting systems.

The "Energy Smart" management system with optical indicators is a standard on the Turbo Boost shredders for zero power consumption in Stand-by mode. Powerful continuous duty motors and the sturdy steel gears with heavy duty chain drive "Super Potential power unit" ensure service free operations without duty cycles or overheating.

All Turbo Shredders can shred paper, Floppy Disks, CDs and Credit Cards separating plastic shred from shredded paper.

The technical data on the bottom of this page clearly demonstrates the technological advantage of the KOBRA 240 Turbo shredders compared to other similar products available on the market.
